Hewlett Packard Enterprise

PROPOSAL TO MONEY SERVICES, INC. FROM HPE FOR HPE MANAGED SERVICES ON AWS EKS-A ENVIRONMENT

Jan 08, 2025

HPE OPE-0018788362

OUR GOAL TODAY

- Proposal Background
- HPE Managed Services Overview
  - Approach
  - Specific Services & Deliverables
  - Project Assumptions
  - Proposal Summary
- Financial Overview
- MS Schedule
- HPE MS ITOC Transition & Governance

OUR UNDERSTANDING

Background

Money Services, Inc. intends to deploy Dev infrastructure for their financial application systems (Pega) on their on-prem virtual environment using Amazon EKS Anywhere.

Money Services, Inc. is considering a HPE Managed Services proposal for the Day-2 Operations. HPE will be assisting Money Services, Inc. for monitoring, management and optimization of EKS-A environment for the contracted term.

Objectives

The scope of this proposal is to provide below services to Money Services, Inc.:

HPE Managed Services:

- Monitor, Operate and Administration Services for EKS-A containerized environment for Pega application.
- Transition Services
- Project and Transition Management

The EKS-A environment will consist of below:

- One Management cluster & One Workload clusters
- 12 Nodes total : 3 Management Nodes and 9 Worker Nodes

HPE MANAGED SERVICES SOLUTION

- Service/Solution overview
- Service/Solution assumption
- Onboarding & Transition
- Operation model & Governance

HPE MANAGEMENT SERVICES INCLUDED

High level Scope

Customer Onboarding:

- Transition management (Managed Services)
- Managed Services Toolsets/integrations
- Delivery readiness/Sign-off
- Customer acceptance/Sign-off

Proactive Monitoring:

- 24x7 Monitoring
- Event Management

Day to Day system operation and administration:

- Incident resolution
- Manage configuration changes
- Perform maintenance activities
- Operational reporting

Lifecycle Management:

- Patch and firmware Implementation (Semi annual)
- Security updates (upon release and urgency)
- Version upgrades (Annual)

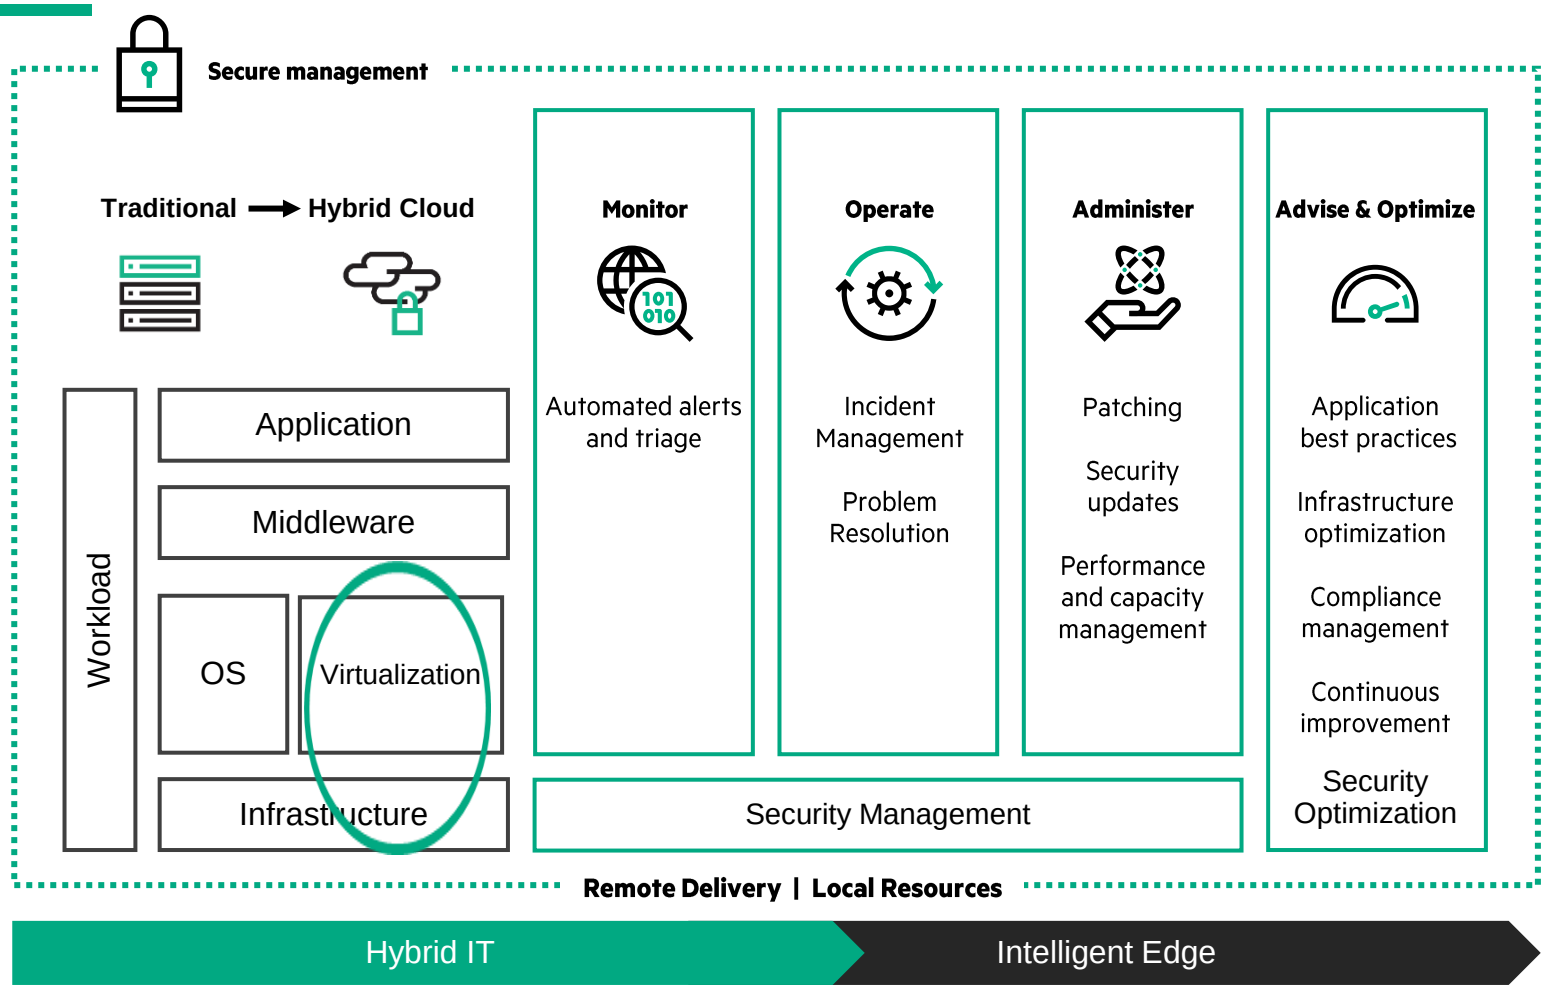
ITIL Based Delivery:

- Incident Management
- Service Request Management
- Problem Management
- Change Management
- Release Management
- Capacity Management
- Configuration Management
- Service level management

Customer Experience:

- Relationship Management (Assigned MSM)
- Delivery Governance
- Operational Reviews

HPE MANAGED SERVICES OVERVIEW



Value Propositions

- Deploy more quickly
- Improve quality; reduce risk
- Cost effective

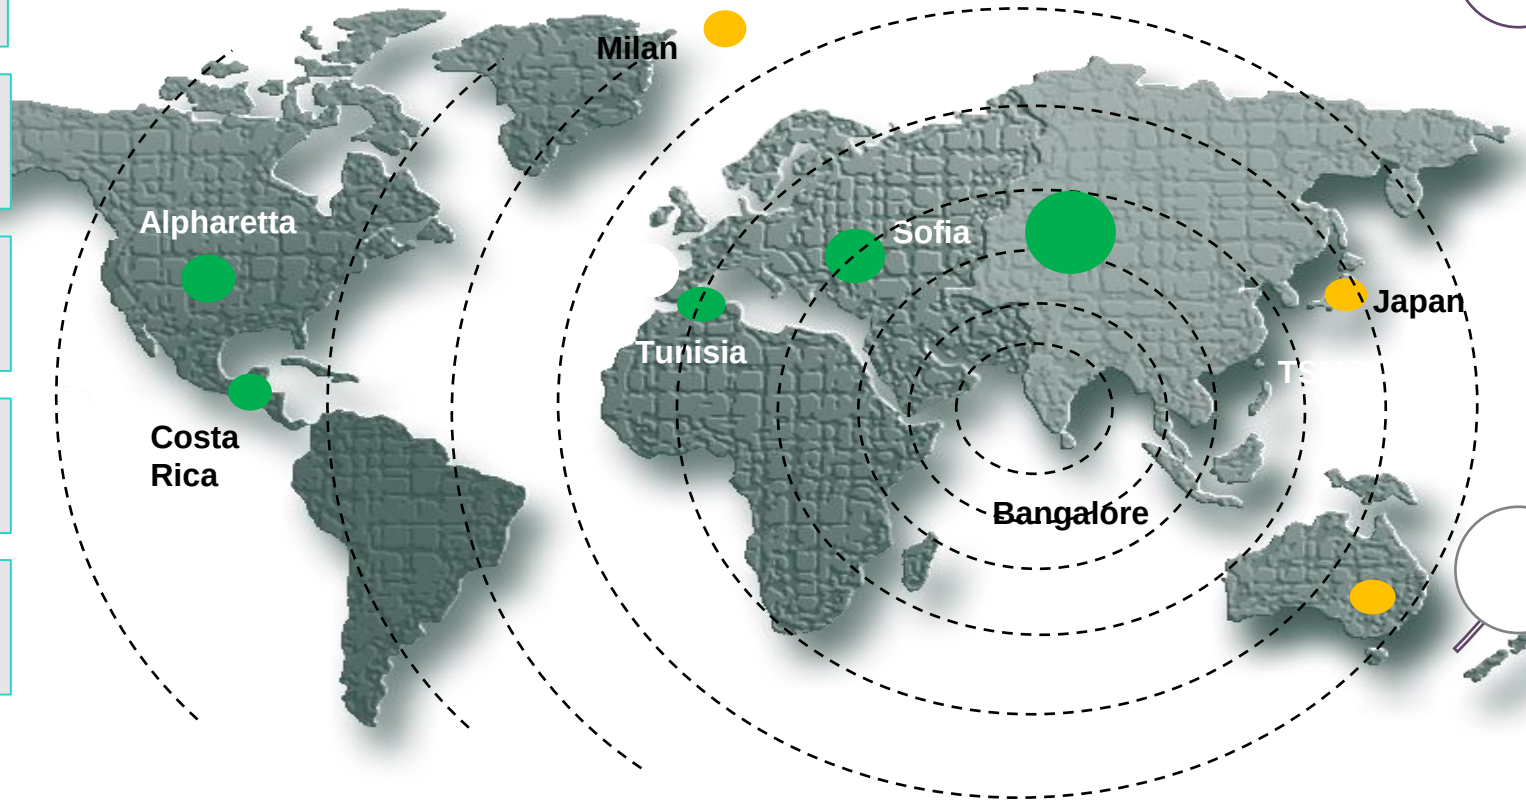
Customer Personas

- ”Run my infrastructure”
- “Run Complex Workloads and Applications”
- “Run the breadth of Core to Cloud to Edge”

HPE INFRASTRUCTURE OPERATION CENTER (ITOC)

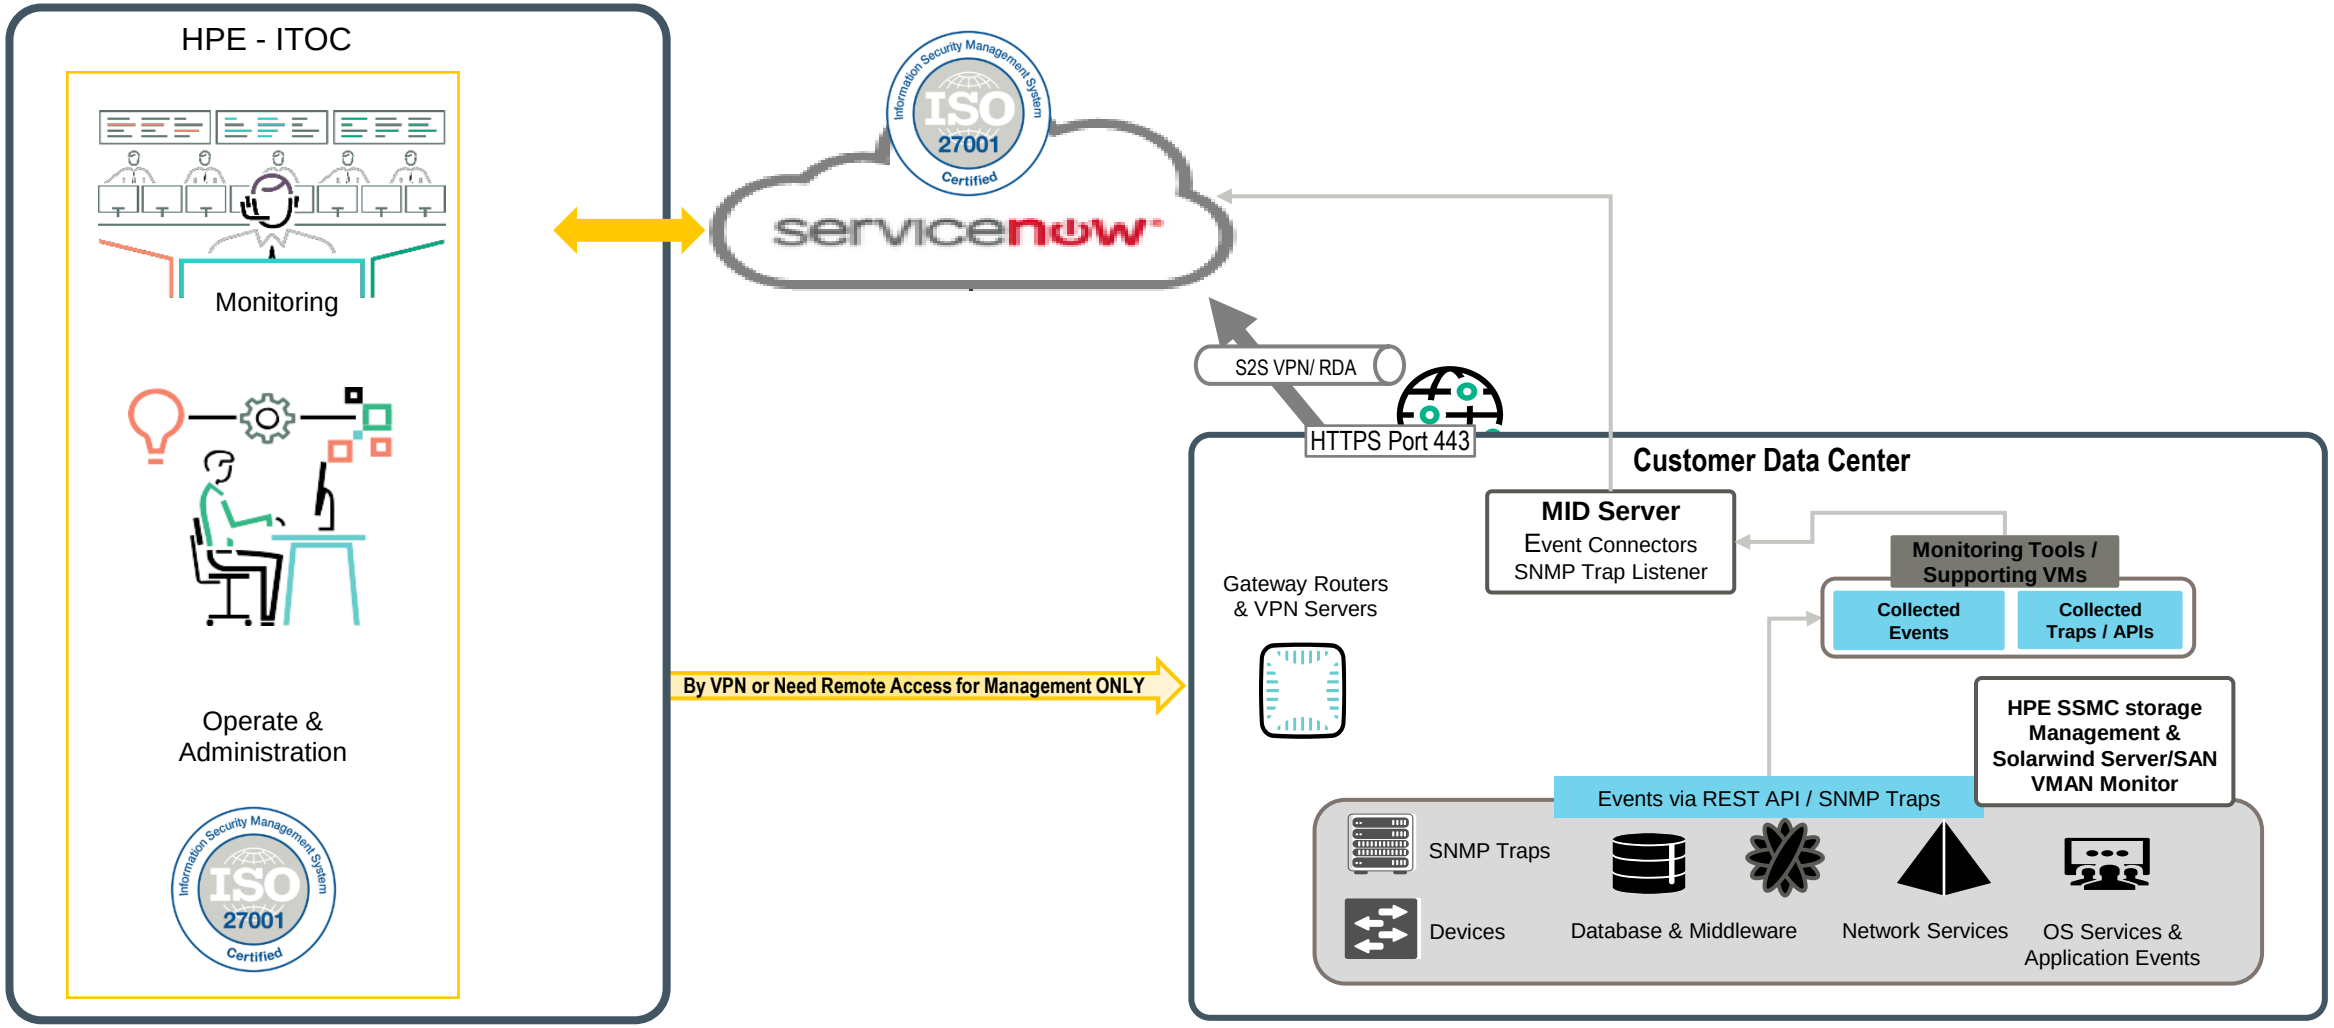
Platform

- **ISO 27001 certified SSAE 16 attestations**
- **Domain Segregation of customer data**
- **Encrypted data in-transit using TLS**
- **24x7x365 cloud operations and support**
- **Test and Development Non- production instances**



- 50 Service Catalogues
- **160 Certifications and** 200+ Training intervention
- 200+ Standard operating procedure
- ISO27001 Certified
- 120K+ Connected Instances

HPE MS MANAGEMENT TOOLS TO SERVICE NOW INTEGRATION



PROJECT ASSUMPTIONS

The listed assumptions should be considered preliminary and not all encompassing:

- Customer will allow HPE full access to all locations where the service is to be performed.
- Any required software, licenses and tools not provided in the GreenLake Solution will be provided by the Customer.
- All the equipment will be racked, stacked and deployment is complete.
- Customer will supply a project liaison and shall schedule any Customer persons required to interact with the HPE to successfully complete the proposed services.
- Customer will ensure the participation of the Customer's IT Cloud administrator, storage administrator, network administrator, server administrator and other selected staff to discuss business or operational objectives and any special requirements as applicable.
- Services will be delivered remotely; Customer will provide all information necessary for HPE to deliver timely and professional remote delivery.
- HPE's ability to deliver this service is dependent upon the Customer's full and timely cooperation with HPE, as well as the accuracy and completeness of any information and data the Customer provides to HPE.

PROJECT ASSUMPTIONS (CONT..)

- Money Services, Inc. will procure and provide all the required Software, OS licenses & binaries required for the solution deployment.
- This Dev (POC) environment will be built on Money Services existing hardware stack in their UK site.
- HPE Managed Service scope & expectation to operate/manage the infrastructure VMs and the container platform.
- Money Services Inc. will manage the OS & application (Pega).
- Money Services Inc. will manage & support the server hardware & Hypervisor layer.
- Money Services Inc. would provide the VMs required for the HPE MS Internal tools (monitoring, management, metering etc.) & will maintain the backup of VMs.
- Customer will assign transition lead to work with HPE transition team to ensure smooth on boarding to MS operation and support services.
- HPE ServiceNow will used as the default ITSM ticketing system.
- For other Infra Monitoring/Management: OpsRamp would be leveraged for all other Infra Monitoring.
- 100% Remote operation model is considered for delivery by HPE ITOC team.

Money Services Inc. Project Schedule

Event	Date/duration
Contract start	Mar/1/2025
Contract end	Feb/28/2030
Contract duration	60 months

HIGH LEVEL PRICING

This Proposal is a budgetary estimate only and it expires on **Feb 08, 2025. The service are being provided by Hewlett Packard Enterprise (HPE).**

Since this estimate is based upon information provided by Money Services, Inc., any inaccuracies, incomplete disclosures or deviations from that information may result in a modification of the estimate, services and obligations set forth herein. The estimate is also conditioned by a set of assumptions drawn from HPE's initial understanding of the opportunity. These assumptions are similarly subject to change based upon the results of future discovery.

As a result, Money Services, Inc. should not rely upon the information contained herein except for the purposes of understanding the nature of services HPE might offer given the work scenario presented. HPE does not make any warranties, guarantees or assurances to Customer and further will not assume any liability through the provision of this budgetary estimate.

Finally, this estimate assumes standard HPE T&C's. In the event that HPE elects to convert this estimate into an offer, through a written notice to Money Services, Inc. then this proposal shall be subject to the completion of due diligence and the negotiation of mutually agreeable Terms and Conditions and fully developed Statement of Work.

HPE thanks Money Services, Inc. for the opportunity to provide this document and looks forward to the possibility of working together in the very near future.

This estimate is for Money Services, Inc. 's budget purposes and is not a guarantee that HPE can complete all Services necessary to achieve Customer's goals within the proposal currently estimated.

ONBOARDING & SERVICE TRANSITION

HPE MS TRANSITION METHODOLOGY (SAMPLE)

Initiation → Joint Verification → Design → Implementation → Acceptance → SLO Operations & Closure

TOPICS

- Transition Project Plan
- Project Governance
- Kick-off meeting
- Infra acceptance Criteria
- Security requirement
- Project Acceptance criteria

TOPICS

- Inventory of infrastructure
- Assess infrastructure Against Infra accept. Criteria
- Install management tools on Bank's VM image

WORKSTREAM – MONITORING & TOOLING

<OneView/OVRS as Server Monitoring/Firmware Patch Tools>

<Suggestion Cohesity silence cluster for GL buffer server, if GMS own Cohesity operation>

WORKSTREAM – SERVICE MANAGEMENT

<Including patch release/change management>

WORKSTREAM – KNOWLEDGE TRANSFER

<Adopt bank's tools and processes>

WORKSTREAM – CONNECTIVITY

<Bank to provide remote access VDI desktop as connection>

TOPICS

GMS Services simulation:

- Testing of monitoring & tooling
- Testing of service management procedures
- Testing of connectivity

Acceptance of GMS implementation

Hand over to SLO Operations

TOPICS

Delivery of services on SLO

- Execute remote management
- Execute monitoring
- Deliver reporting

Sign-Off on Project Acceptance Criteria

Project Closure

Hand over to SLA Operations

CASE ENTRY & DELIVERY GOVERNMENT

HPE MS CASE ENTRY POINT

Entry Point

Automated Monitoring /Alerting

- Utilize APC and Industry Tools for event management. Pulling and Pushing SNMP, API, ETC for event capture.
- Events are forwarded to ServiceNow and Correlated for auto-ticket (Incident) generation.

Dedicated Telephone Number:

- Customer will be provided a dedicated Telephone number, connecting them instantly with an ITOC specialist.
- The ITOC Specialist will not only take the case and begin troubleshooting but will also drive E2E resolution and communication back to the customer.

Automated Monitoring /Alerting

Monitoring & Management

- ServiceNow
- Hardware Traps
- OS
- Native Tools

SNOW & Portal SR's / INC's

IT Service Management

- Event
- Incident
- Problem
- Change
- Configuration
- Capacity
- Availability
- Vendor

Dedicated Telephone Number

Telephony

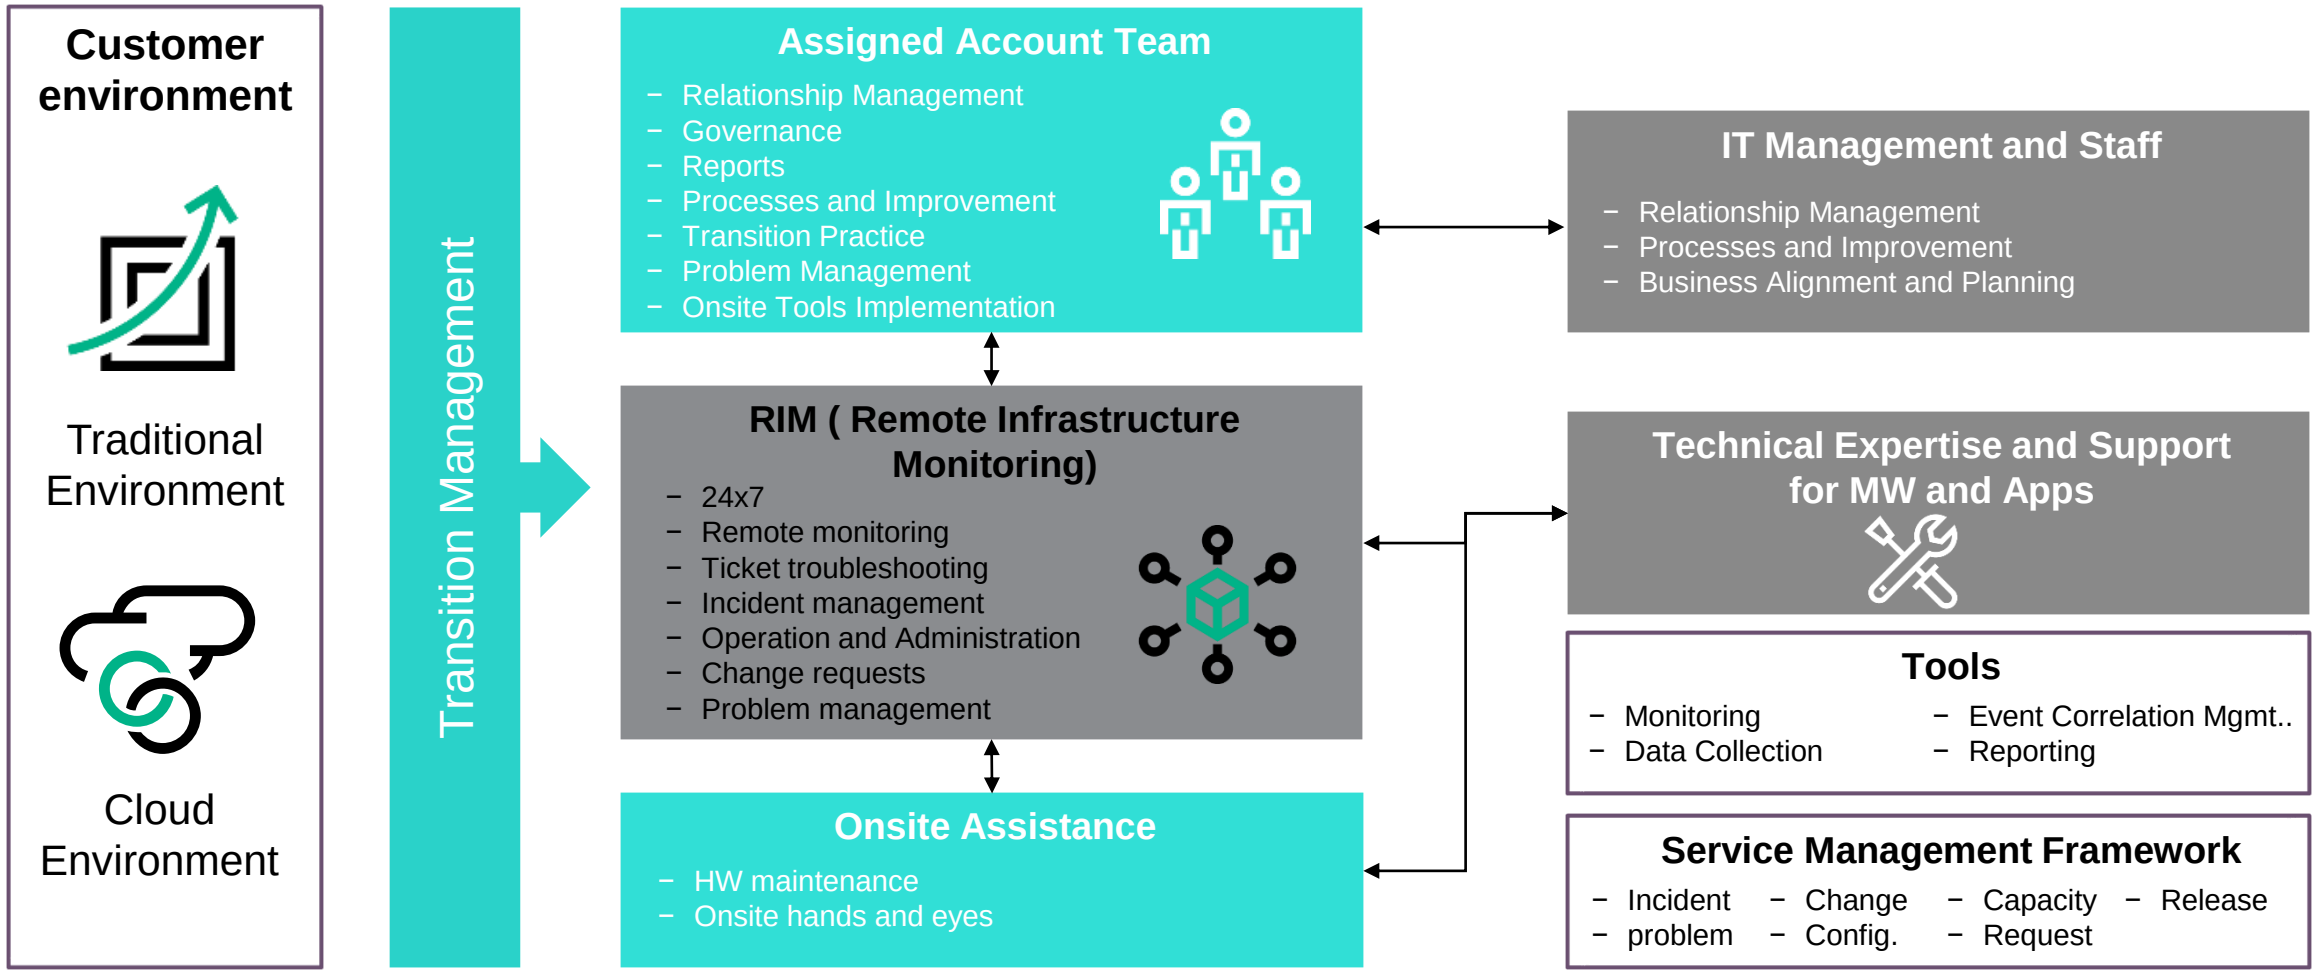
- Service Request
- Incidents

SNOW Portal SR's / INC's

Personalized Customer Portal and Service Catalogue for the customers delivery leveraging ITSM Standards.

- Manual Incident, Service and Change request submission.
- Track status of cases and service requests
- Dashboarding capability available
- Canned Reporting
- Automated Communication
- E-mail compatibility
- Mobile Phone App

HPE MS ITOC OPERATION MODEL & GOVERNANCE



THANK YOU
